DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-8 are allowed.

2. Regarding claims 1 and 6, Silvy *et al.* (US 4,456,981) disclose an optical disk medium with a spiral recording track divided into physical segments of a specific length each of which has a preformat modulation section formed in a specific position of a part of the segment, the optical disk medium comprising:

a recording data string composed of a plurality of synchronous frames each of which is formed by dividing an original data string of a specific length into blocks, creating error correction codes, adding the codes to the blocks, and further placing a fixed number of data items converted into synchronous data and coding data (Col. 2, Lines 41-46 and Col. 2, Lines 54-64).

However, no reference alone or in combination discloses

data items in the coding data contributing to the creation of the same error correction code which are arranged at regular intervals of E in the recording data string, with a data segment length L obtained by adding an additional synchronous frame to the recording data string and a physical segment length A satisfying the equation $L = mA$ where m is a natural number and, A is set indivisible by E .

Therefore claims 1 and 6, and dependent claims 2-5 and 7-8, are allowable over the prior art of record.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujiie *et al.* (US 5,528,569) disclose a method for recording digital data in data clusters and cluster linking sectors on a recording medium.

Yoshiura *et al.* (US 6,079,043) disclose a disk apparatus with means for dividing a large amount of data into segments with error correction code added thereto.

Narahara *et al.* (US 6,262,950) disclose an optical disc recording method including a minimum run length of a modulated code based on a predetermined modulation rule.
